Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Veerlakeerthi/Edu-Genie-Google-Gemini-Powered-Learning-Assistant/tree/main/AI-ML-and-GEN-AI-Track-Project-Template-main/EduGenie
Programming Language(s)	Python
Framework(s) Used	FastAPI(primary Backend Framework),jinja2,Hugging Face
Key Features Implemented	AI-based Question Answering, Concept Explanation, Quiz Generation, Content Summarization, Personalized Learning Support
Pending / Incomplete Features	Voice-based interaction and PDF upload are planned for future enhancement.
Setup / Run Instructions	Install the required packages using pip install -r requirements.txt, configure the API key in the .env file, and run the project using uvicorn app:app --reload.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project was developed with a focus on simplicity and ease of use. The code is organized into separate files for the frontend and backend, making it easier to understand and maintain. The application was tested with different learning tasks to ensure the core features work as expected. Future improvements such as voice input, document upload, and multilingual support can be added to make the learning experience more interactive.
