Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	N/A
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	N/A
8	Dockerfile / Containerization config (if applicable)	N/A
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	No

Step 2: File / Folder Structure

```

Edu Genie/
├── app.py
├── requirements.txt
├── README.md
├── .env.example
├── static/
│   └── style.css
├── templates/
│   └── index.html
└── __pycache__/
  
```

Provide an overview of your project's file and folder structure below:

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Localhost
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Local Machine (FastAPI + Uvicorn)
Repository Link	https://github.com/Veerlakeerthi/Edu-Genie-Google-Gemini-Powered-Learning-Assistant
Demo Video Link	N/A

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites

- Python 3.11+
- Visual Studio Code
- Git
- Internet Connection
- Groq API Key

Step 1: Download or clone the project from GitHub.

Step 2: Open the project folder in Visual Studio Code.

Step 3: Create and activate a Python virtual environment.

Step 4: Install all required Python packages using the requirements.txt file.

Step 5: Configure the .env file with your Groq API Key.

Step 6: Start the Fast API application using Uvicorn.

Step 7: Open a web browser and visit <http://127.0.0.1:8000>.

Step 8: Select a learning task, enter your question or topic, and click **Generate Response** to use the application.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Internet is required for AI response generation.	Connect to the internet and use a valid Groq API Key.
2	No user authentication system.	Planned for future enhancement.
3	No database support in the prototype.	Can be extended using MySQL or MongoDB in future versions.
