Project Name	XXXXXX
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	The application depends on an internet connection and AI API availability.	AI responses cannot be generated without internet access.	High
2	Currently supports only text-based interaction.	Users cannot use voice or document-based input.	Medium
3	No user login or progress tracking feature.	Learning history and personalized progress are not saved.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Suitable for small-scale usage.	Deploy on a cloud platform to support more concurrent users.
2	Data Storage	No database is used currently.	Integrate a database such as MySQL or MongoDB to store user history and learning progress.
3	Performance	Performance depends on API response time.	Optimize API calls and use caching to improve response speed.
4	Security	API key is stored in a .env file.	Add user authentication and role-based access for better security.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	User Login and Registration System	Next 2 Months	Secure user access and personalized experience.
Phase 2	Database Integration (MySQL/MongoDB)	Next 3 Months	Store user profiles, progress, and learning history.
Phase 3	Voice Assistant & Multi-language Support	Next 5 Months	Improve accessibility and support users from different regions.
Phase 4	Mobile Application & Cloud Deployment	Next 6 Months	Make EduGenie available on Android/iOS and accessible worldwide.
